

# ROKSTONE KLIK

SPECIALIST CASUALTY UNDERWRITING FOR COMPLEX  
DIGITAL ECONOMY AND FUTURE MOBILITY RISKS

Rokstone Klik is a new team focused on businesses operating at the intersection of future mobility, digital platforms and technology-enabled risk.

As these business models scale and evolve, liability exposures become more interconnected, harder to model, and less suited to standard underwriting. Rokstone Klik is built to underwrite that complexity - with clear appetite, tailored structures, and specialist knowledge.

What we underwrite:

- > Tech-enabled, usage-based Auto and General Liability
- > Future mobility operators and technology-driven fleets
- > Embedded insurance exposures within digital platforms
- > Sharing and gig-economy liability models

## CAPACITY & MARKET POSITION

Backed by Lloyd's of London and a leading A rated company market insurer, Rokstone Klik can operate as a lead or follow position combining underwriting conviction with the ability to deploy meaningful, collaborative capacity.
